About Metal Seal Precision

Metal Seal Precision is a \$45 million manufacturer of precision metal components that employs more than 260 professionals and serves more than 50 customers in 22 states in 12 countries on three continents. We are one of just a handful of machined parts suppliers in North America with more than 350 pieces of equipment, in-house tooling and in-house anodizing...all under single roof with single source responsibility. But that's just part of story. While world-class technology is important, the thing that truly differentiates Metal Seal Precision is craftsmanship. We don't just make components, We craft them. Led by our team of master craftsmen we recruit, hire and retain machining professionals who blend old world craftsmanship with leading edge technology to deliver perfection that is demanded by many but achieved by few.
